

UNITED STATES OF AMERICA
FEDERAL ENERGY REGULATORY COMMISSION

Electricity Market Design and Structure
Notice of Working Paper

Docket No. RM01-12-000

NOTICE OF EXTENSION OF TIME

(March 25, 2002)

On March 15, 2002, the Commission distributed a working paper, in the above-docketed proceeding, on standardized transmission service and wholesale electric design (working paper) in an attempt to stimulate public discussion that can guide the development of a proposed rulemaking. The Commission set the due date for comments on the working paper to be filed on or before March 27, 2002. Because the Commission has received a number of inquiries with respect to extending the comment date, including a formal request for an extension of time by the National Association of Regulatory Utility Commissioners, the Commission hereby extends the date for the filing of comments on the March 15, 2002 working paper to and until April 10, 2002.

Magalie R. Salas
Secretary
