<b>Notes:</b>						
<sup>a</sup> Due to the number of changes made to this table since the issuance of the Draft EIS, margin lines indicating changes are not present.						
<sup>b</sup> This list does not include the approximately 1.9 miles of existing fence line, as depicted in right-of-way typical 36.20, that would be collocated by the Project.						
<sup>c</sup> Typical right-of-way drawings corresponding to these values are presented in Appendix C.						
<sup>d</sup> MEP has filed revised alignment sheets depicting a 100-foot nominal right-of-way for Project construction, as described in Section 2.0. The 100 foot construction right-of-way may not be depicted in all Appendix C right-of-way typicals.						
<sup>e</sup> Midcontinent Express Pipeline, LLC proposes to maintain a 60-foot-wide permanent pipeline right-of-way in these areas.						
<sup>f</sup> This right-of-way typical is included at the end of Appendix C (C-56 for 30.10 and C-57 for 36.11).
